

Submitting a Homework Project

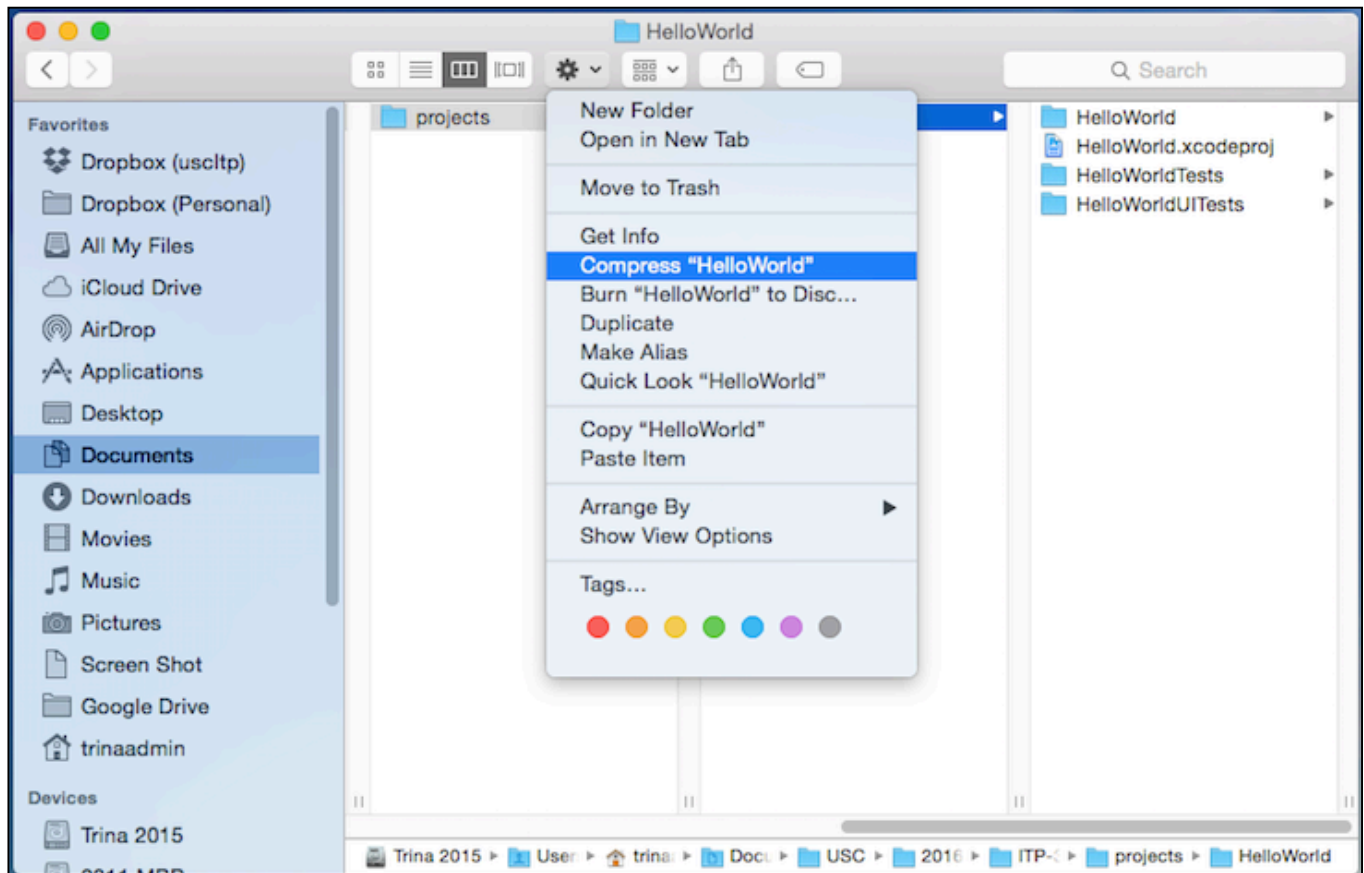

You need to submit your entire project in order for us to grade it. You need to include the Xcode project file (.xcodeproj) and the actual source files (.m, .h, .png, etc).

1. Using Finder, select the top-level project folder.
2. Compress the folder. One way to do this is to right-click (or control-click) on the folder name and selecting the **Compress FolderName** option. An alternative way is to select the **Action** pull-down (looks like a gear) and select the **Compress FolderName** option. A zip file named *FolderName.zip* will be created
3. Rename the zip file to LastFirstHomework#.zip where Last is your last name (first letter capitalized), First is your first name (first letter capitalized), and # is the homework number.
4. On Blackboard under Assignments, click on the name of the assignment such as Homework1.
5. Under the *Assignment Submission* section to the right of the *Attach File* label, click on the **Browse My Computer** button.
6. Navigate to your zip file.
7. Click the **Choose** button.
8. Click the **Submit** button.
